(54) Title: METHOD FOR AUTOMATICALLY EDITING VIDEO SEQUENCES AND CAMERA FOR IMPLEMENTING THE METHOD

(57) Abstract: The invention relates to a method for automatically editing video sequences to produce lenticular grid hardcopies, comprising a) the selection (22) of a first set of images ( $S_1$ ) in a shot image sequence, b) the assignment (24) to each image of the image set of an individual quality factor as a function of image characteristics, c) the selection (28, 28a) of at least one new image set ( $S_2$ ) by replacing at least one image of the previously selected image set by a new image of the shot sequence, d) the preparation (32) of image data to form a lenticular grid hardcopy, based on an image set taken from among the previously selected image sets and with the highest overall quality factor, the overall quality factor being a function of the individual quality factors of the images of each selected image set.
